<https://jevon365.github.io/>

Analytical problem-solver with a background in economics, data tools (SQL, R, Excel, Tableau), and front-end development. Experienced in leading teams, building dashboards, coordinating large-scale operations, and translating complex requirements into clear, actionable insights. Skilled at uncovering patterns, improving processes, and communicating findings to both technical and non-technical audiences.

EXPERIENCE

Oregon Software Consulting Club, *Project-Lead*

Sep 2023-July 2024

- Led a team building full-stack software products for local clients, translating requirements into clear development tasks.
- Managed sprints, task assignments, and pull-request review to ensure high-quality, on-schedule delivery.
- Coordinated communication between stakeholders and developers to align product features with business needs.

Skinny Kitty Teahouse, *Lead Organizer*

Summer 2025

- Directed operations, logistics, and planning for a 100+ person organization, managing a **\$15,000 budget** with spreadsheets and forecasting.
- Organized recruitment, scheduling, and coordination across multiple volunteer teams.
- Led a cross-functional admin team to ensure clear communication, effective planning, and smooth on-site execution.

Wayfair, *Customer Service Specialist*

Oct 2020 - Dec 2021

- Promoted twice for top performance, and customer experience excellence.
- Received an internal award for outstanding service and communication.

Certificate

Google Data Analytics,

Dec 2025

- Data cleaning, Visualization and analytical workflows.
- R, SQL, Tableau and spreadsheet based analysis.
